

**PRESS RELEASE**

15 May 2023

## **The CORIUS Group's first dermatological doctors' congress**

### **Leading experts discuss the latest developments and medical findings**

**Frankfurt am Main. The first CORIUS DERM Conference was held on 5 and 6 May at the Scandic Hotel on Frankfurt's Museumsufer embankment. Around 100 specialist doctors and assistants in further training participated in the network-wide event, with two days of exciting discussions on the latest research findings and treatment methods.**

#### **CORIUS DERM Conference – Promoting exchange, pooling expertise**

Network-wide exchange of knowledge and expertise has been the Group's focus since the very beginning. Regular meetings between leading doctors (medical board) developed and continue to develop synergies, present opportunities for collaboration, discuss innovations and promote personal exchange. Heidi Niemöller, CEO of the CORIUS Group, and Prof. Uwe Reinhold, medical director of the MVZ Dermatologisches Zentrum Bonn, designed the CORIUS DERM Conference to keep this vital exchange and cohesion going in an ever-expanding network. 'We looked for a way of bringing all of the Group's doctors and assistants together in one place to all get to know each other and share their expert knowledge with the network', Heidi Niemöller explains. 'Along with Prof. Reinhold, the president of our medical board, we decided that the logical next step was a congress for all of the Group's doctors.' The CORIUS DERM Conference was also certified with eleven points for further training.

#### **Lots of specialist lectures, one goal: to design the future of dermatology**

The unique idea behind the CORIUS DERM Conference included tailored lectures and interaction opportunities for stakeholder groups involving both doctors and assistants in further training. A total of 27 lectures highlighted dermato-oncological topics (including 'Developing electrochemotherapy in dermatological oncology') as well as aspects of aesthetic medicine (including 'Holistic concepts for facial rejuvenation') and laser medicine (including 'Laser medicine in dermatology in 2023: innovation or stagnation?'). Plus, new research findings in operative dermatology were presented using the example of fish skin transplants and innovative treatments for psoriasis. One

highlight in particular was Prof. Hans-Jürgen Tietz's guest lecture on mycological PCR diagnosis in practice.

## **CORIUS DERM Academy – further training for assistants**

As well as lectures for specialist doctors, there was also a range of specialist content put together specially for assistants in further training. Participation in this programme is part of the CORIUS DERM Academy, a training series for all assistants in the network. 'Our aspiring doctors are the future of dermatology. That's why it's all the more important to actively integrate, encourage and challenge them from the very beginning and to accompany them on their path,' according to Prof. Reinhold. 'The wide range of initial and further training opportunities in the network permits intensive specialist exchange that makes us a strong, collaborative group.'

## **About the CORIUS Group**

The CORIUS Group is a network of dermatology and phlebology practices and clinics in Germany, the Netherlands and Switzerland. The group's main goal is to design the future of medicine and guarantee comprehensive care. Personalised successor models, attractive career opportunities and a significantly lighter administrative burden for medical staff make the CORIUS Group a strong, dependable partner. Since it was founded in 2017, the network has expanded to include around 50 locations, united by one goal: to design the future of dermatology.
