

PRESS RELEASE

1 October 2025

CORIUS expands dermatology care in the Rhine-Main area

Die Hautarztpraxis MVZ Königstein im Taunus joins the network

Munich/Königstein im Taunus. In the fourth quarter of the 2025 financial year, the CORIUS Group welcomes another renowned dermatological practice to its network in addition to the MVZ Haut- und Laserzentrum Barnim: Die Hautarztpraxis MVZ Königstein im Taunus has been part of Europe's largest network of dermatology and phlebology practices and clinics since 1 October 2025.

The practice, led by Prof. Jens Gille and Dr Konstanze Spieth-Gille, has been a trusted institution in the region for many years and is recognised for its comprehensive dermatological expertise. With an experienced team of doctors, state-of-the-art treatment plans, and a clear focus on guideline-based, evidence-backed dermatology, the practice offers a wide range of medical services.

In addition to allergology and aesthetic treatments, this includes classic and surgical dermatology, with a particular focus on managing skin cancer, both conservatively and surgically. Computer- and AI-assisted early detection of skin cancer, as well as the treatment of non-melanoma skin cancer and its precursors using all forms of photodynamic therapy are another focus. This fits within the dermato-oncological orientation of Prof. Gille and Dr Spieth-Gille, who both spent many years at Frankfurt am Main's university skin clinic as senior consultants.

‘Incorporating Die Hautarztpraxis MVZ Königstein im Taunus marks an important step for us – not only because it will further expand our presence in the Rhine-Main area, but also because we will gain a practice with outstanding expertise and a clear scientific orientation,’ explains Heidi Niemöller, CEO of the CORIUS Group. ‘Prof. Gille and Dr Spieth-Gille embody patient-centred dermatology that combines state-of-the-art diagnostics with extensive clinical experience. This aligns perfectly with our aspiration to guarantee the highest level of dermatological care in Germany while also generating fresh impetus for research, prevention and innovative treatments.’

About the CORIUS Group

The CORIUS Group is a network of dermatology and phlebology practices and clinics in Germany, the Netherlands and Switzerland. The group's main goal is to design the future of medicine and guarantee comprehensive care. Personalised successor models, attractive career opportunities and a significantly lighter administrative burden for medical staff make the CORIUS Group a strong, dependable partner. The common goal: to design the future of dermatology and phlebology.
