

PRESS RELEASE

1 October 2025

CORIUS strengthens dermatological care in Brandenburg

MVZ Haut- und Laserzentrum Barnim joins the CORIUS Group on 1 October

Munich/Bernau bei Berlin. On 1 October 2025, the CORIUS Group will expand on two fronts: In addition to a new dermatological practice in the Taunus region, the MVZ Haut- und Laserzentrum Barnim is also joining Europe's largest network of dermatology and phlebology practices and clinics. The group is not only gaining another highly specialised practice, but also strengthening local access to dermatological care in Brandenburg and the area around Berlin.

Under the direction of Dr Linda Duhn, this practice in Bernau bei Berlin (just 10 kilometres northeast of the German capital) has earned a reputation as an expert provider of state-of-the-art dermatological medicine. With a team comprising 14 employees – including two other specialists alongside Dr Duhn – the MVZ Haut- und Laserzentrum Barnim offers its patients a wide array of medical, diagnostic, aesthetic and laser-based services.

In the medical-dermatological field, its range encompasses computer- and AI-enhanced skin cancer prevention as well as the diagnosis and treatment of chronic skin conditions, allergies, venous diseases and work-related skin diseases. The practice is particularly specialised in laser therapy and the surgical treatment for benign and malignant skin alterations, as well as aesthetic treatments both with and without lasers.

In addition to general dermatology, the MVZ Haut- und Laserzentrum Barnim also offers a wide selection of aesthetic services designed to rejuvenate and regenerate the skin. These include treatments with fillers, botulinum toxin, volumising treatments, laser treatments and various peels. The practice also offers state-of-the-art instrument-based methods, such as RF microneedling or HydraFacial.

Dr Linda Duhn's team are committed to professional growth: The practice trains medical assistants as well as specialists in skin and venereal diseases, and is a teaching practice for the Brandenburg Medical School Theodor Fontane in Neuruppin.

'Incorporating the MVZ Haut- und Laserzentrum Barnim not only brings us an excellently positioned practice, but also a partner that embodies the very essence of modern dermatology,' says Heidi Niemöller, CEO of the CORIUS Group. 'Dr Linda Duhn combines the highest medical standards with innovative use of laser-based technology and

aesthetic procedures in Bernau. Especially in a region with such dynamic growth as the area around Berlin, it is crucial to provide patients with access to cutting-edge dermatological care close to their homes, so this incorporation is a great sign for future-oriented healthcare provision in Brandenburg.'

About the CORIUS Group

The CORIUS Group is a network of dermatology and phlebology practices and clinics in Germany, the Netherlands and Switzerland. The group's main goal is to design the future of medicine and guarantee comprehensive care. Personalised successor models, attractive career opportunities and a significantly lighter administrative burden for medical staff make the CORIUS Group a strong, dependable partner. The common goal: to design the future of dermatology and phlebology.
