

PRESS RELEASE

1 October 2025

Practice succession at MVZ Dermatologie im Villenviertel

Dr Jens Würker hands over medical management to Dr Anne Fröhlich

Bonn – After 16 successful years, Dr Jens Würker, specialist in skin and venereal diseases, is stepping back from active patient care. On 1 October 2025 he is handing over the management of MVZ Dermatologie im Villenviertel to Dr Anne Fröhlich, who will take the practice forward along with its experienced medical team.

How it all began

Dr Jens Würker looks back on an impressive career: After his post as a senior consultant at Fachklinik Hornheide – the largest centre for skin tumours in Germany – he established his own practice in Bonn, where he has performed thousands of surgical procedures. Under his leadership, the practice has become one of the most renowned ports of call for the diagnosis and treatment of skin cancers in North Rhine-Westphalia.

A secure succession plan

For many practice owners, finding a suitable successor is one of their greatest challenges – particularly at a time when fewer and fewer young physicians are willing to take on the risks of running their own practice. 'In dermatology especially, we've seen for years how difficult it has become to find successors who have both the professional expertise and the courage to go independent, so I'm all the more grateful that we've been able to put a long-term solution in place for our practice at an early stage,' explains Dr Jens Würker.

The practice in Bonn-Bad Godesberg became part of the CORIUS Group, Europe's leading network of dermatology and phlebology practices and clinics, back in 2022. The group specialises in relieving doctors of the burden of succession planning, developing individual solutions and therefore ensuring uninterrupted patient care. This partnership secures the practice's long-term future, and patients can continue to rely on high-quality dermatological and phlebological treatment.

Expertise for the future: Dr Fröhlich takes the reins

Dr Anne Fröhlich is an experienced specialist in skin and venereal diseases, a seasoned pair of hands taking the helm at MVZ Dermatologie im Villenviertel. She most recently worked as a senior consultant at the University Hospital of Bonn's Dermatology Department, where she managed dermatological surgery. Dr Fröhlich brings wide-ranging surgical expertise and knowledge of medicine-based tumour therapy and state-of-the-art diagnostics.

'I'm so happy to be able to leave the practice in such capable hands,' says Dr Würker. 'Dr Fröhlich combines outstanding specialist knowledge with genuine empathy for our patients – an ideal foundation for leading the practice successfully into the future.'

With new medical leadership, the practice on Rüngsdorfer Straße with its well-versed team continues to be a trusted port of call for patients in and around Bonn. Whether skin cancer screening, outpatient surgery, laser medicine or aesthetic dermatology, MVZ Dermatologie im Villenviertel's existing ISO 9001 certification guarantees the highest quality standards and state-of-the-art treatment methods.

Dr Anne Fröhlich is also optimistic about the future: 'It is a great honour for me to continue Dr Würker's work and, together with the practice team, ensure the highest level of care.'

About the CORIUS Group

The CORIUS Group is a network of dermatology and phlebology practices and clinics in Germany, the Netherlands and Switzerland. The group's main goal is to design the future of medicine and guarantee comprehensive care. Personalised successor models, attractive career opportunities and a significantly lighter administrative burden for medical staff make the CORIUS Group a strong, dependable partner. The common goal: to design the future of dermatology and phlebology.
